CLAIMS

- 1. A children's trampoline comprising
- a rebounding surface having a periphery;
- a frame connected to said periphery to support the rebounding surface in
- an elevated position, and
- a child supporting device, said device including
- an armature having a lower end connected to the frame and an up-
- per end which extends above and over the rebounding surface, and
- a covering on said armature, said covering including a plurality of
- gripping portions which may be grasped by a child standing on the rebounding surface.
- 1 2. The trampoline defined in claim 1 wherein said armature is rigid.
- 1 3. The trampoline defined in claim 1 wherein said armature is resilient.
- 4. The trampoline defined in claim 1 wherein said armsture has segments extending
- 2 into said gripping portions.
- The trampoline defined in claim 1 wherein said covering is padded and in the
- form of an animal or human character.
- 1 6. The trampoline defined in claim 5 wherein said gripping portions comprise ex-
- tremities of said character.
- 7. The trampoline defined in claim 6 wherein said character has additional extremi-
- ties which are flexible.
